

SHOMER

Incident to Action

A reporting and response tool for antisemitic incidents
in New York City

An IAC Initiative • Hackathon Demo

What is SHOMER?

Report

Submit what happened, where, and when — anonymously if preferred.

Triage

AI classifies severity and recommends the right response path.

Respond

Get a sequenced plan with contacts, deadlines, and next steps.

What the app does

- Anonymous incident intake via text or browser speech-to-text
- Manhattan-focused incident map with privacy-fuzzed locations
- AI-generated action plans with contacts, deadlines, and rationale
- Four-tier severity model: T1 Emergency → T4 Pattern
- Pattern tracking turns low-grade incidents into collective evidence

Severity Tiers

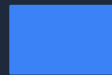

T1 —
Emergency

T2 — Urgent

T3 — Standard

T4 — Pattern

Why this matters

"Every New Yorker deserves to feel safe and welcome in our city. Jews are no exception."

- Antisemitic incidents in NYC are rising and often go unreported.
- Victims and witnesses frequently don't know where to turn or what to do next.
- Isolated events feel invisible; aggregated data reveals patterns and pressure points.
- Fast, guided triage turns confusion into clear, time-bounded

Who it's for

Victims & Witnesses

Anyone who experiences or sees antisemitic conduct and needs guidance.

Community Organizations

Synagogues, JCCs, and civic groups tracking local incidents.

Campus Groups

Students and staff navigating Title VI reporting and school protocols.

Civic Advocates

Leaders using verified data to push for policy and safety improvements.

From report to action

1

Submit

Describe what happened, where, and when.

2

Triage

AI assigns a T1-T4 tier and explains its reasoning.

3

Respond

Receive immediate steps, contacts, and deadlines.

Tech stack

Frontend	React 19 + TanStack Start + Tailwind CSS
Backend	TanStack server functions on Cloudflare Workers
AI	Lovable AI Gateway + Google Gemini 3.7 Flash
Database	PostgreSQL via Lovable Cloud / Supabase
Maps	MapLibre GL + Carto dark basemap
Storage	Supabase private evidence storage with RLS

SHOMER

Report. Map. Respond.
